## SINGLE FEASIBLE SOURCE PURCHASE POSTING NOTICE

**The Missouri Department of Transportation has determined that only one source can provide the products or services described below**

**Title:** SFS 7-110323 Onyx – Mastic Surface Treatment

**Description:** Onyx is a mastic surface treatment material comprised of cationic asphalt emulsion, aggregate, and mineral filler. The product is designed for superior performance to protect and extend the life of pavement. Onyx is an environmentally friendly product and is comprised of post consumer and post industrial engineered material. Onyx primary use is for the preservation of roadways and shoulder pavement. It's secondary use is for the preservation of parking lots, park trails, sidewalks, driveways, and bridge decks. Beneficial features of using Onyx is that it is a cost effective preventative maintenance treatment designed for a simple, black, durable, and consistent application. Labor and equipment requirement is minimal in comparison to conventional preventative maintenance treatments such as chip/scrub seals. Purchases relating to this product are not expected to exceed \$25,000 individually and/or cumulatively during the MoDOT pilot project. This pilot project is needed for additional testing.

**Contract Period:** One-time Pilot Project

**Renewal Options:** N/A

**Agency:** Missouri Department of Transportation

**Supplier:** Majeska & Associates

**Buyer:** Cathy Bay
